Intrastate gas pipeline

Aerial imagery: USDA NAIP imagery via USGS The National Map — Public domain (USDA/USGS), retrieved 2026-10-22. Gas pipelines: EIA Natural Gas Interstate and Intrastate Pipelines (Esri Living Atlas copy), layer last edited 2025-12-04 — mapped approximations at varying scale, not surveyed routes and not a locate. 2 of 2 listed gas facilities fall outside this frame; the gas map in the natural gas section shows them. Marker positions are the source dataset's own coordinates; where records coincide, markers are separated slightly so each stays visible. Distances in the

*** Not necessarily an interconnection point.**

- **named terminal facility** — Named facility with only 1 line connection. May be a distribution substation or a dedicated customer service rather than a transmission-level interconnection point.
- **line tap point** — Named TAP<id> in the source data — a junction on a transmission line rather than a load-serving substation. Not normally an interconnection point.

- Distances are straight-line (haversine), **not** engineering route length.
- HIFLD does not record substation ownership. Proximity does not imply availability — a nearby facility may be a customer-owned on-site substation serving an adjacent property.
- 2 of 8 carry a placeholder name in the source dataset.

`https://services1.arcgis.com/CD5mKowwN6nIaqd8/arcgis/rest/services/project_renewable_us_substations_2022/FeatureServer/10`

ALSO MAPPED IN OPENSTREETMAP

Substations at 69 kV and up within 10 miles that OpenStreetMap maps and the HIFLD dataset above does not. These are often yards built since HIFLD's snapshot. A yard is listed only when no HIFLD point lies inside its mapped outline or within 500 feet of it (0.3 mile for a yard mapped only as a point), and none of the same name within a mile; the list above is unchanged by this table.

None within 10 miles.

- OpenStreetMap is mapped by volunteers. Coverage varies by area, and name, operator, voltage and type are as tagged, not verified. It records no owner and no in-service date.
- "Industrial" usually marks a customer-owned yard. Proximity does not imply availability.

3 NATURAL GAS INFRASTRUCTURE

Mapped gas transmission pipelines and pipeline facilities near this point, from public EIA and HIFLD datasets. The map below is scaled to the gas network; pipelines within its frame are also drawn on the site map in section 2.

Gas distribution company

PACIFIC GAS & ELECTRIC CO mapped territory

Gas local distribution company whose mapped service territory contains this point · investor-owned · 4,453,482 customers as recorded. Polygons in this layer are often county- or town-shaped approximations.

Transmission pipelines within 25 miles

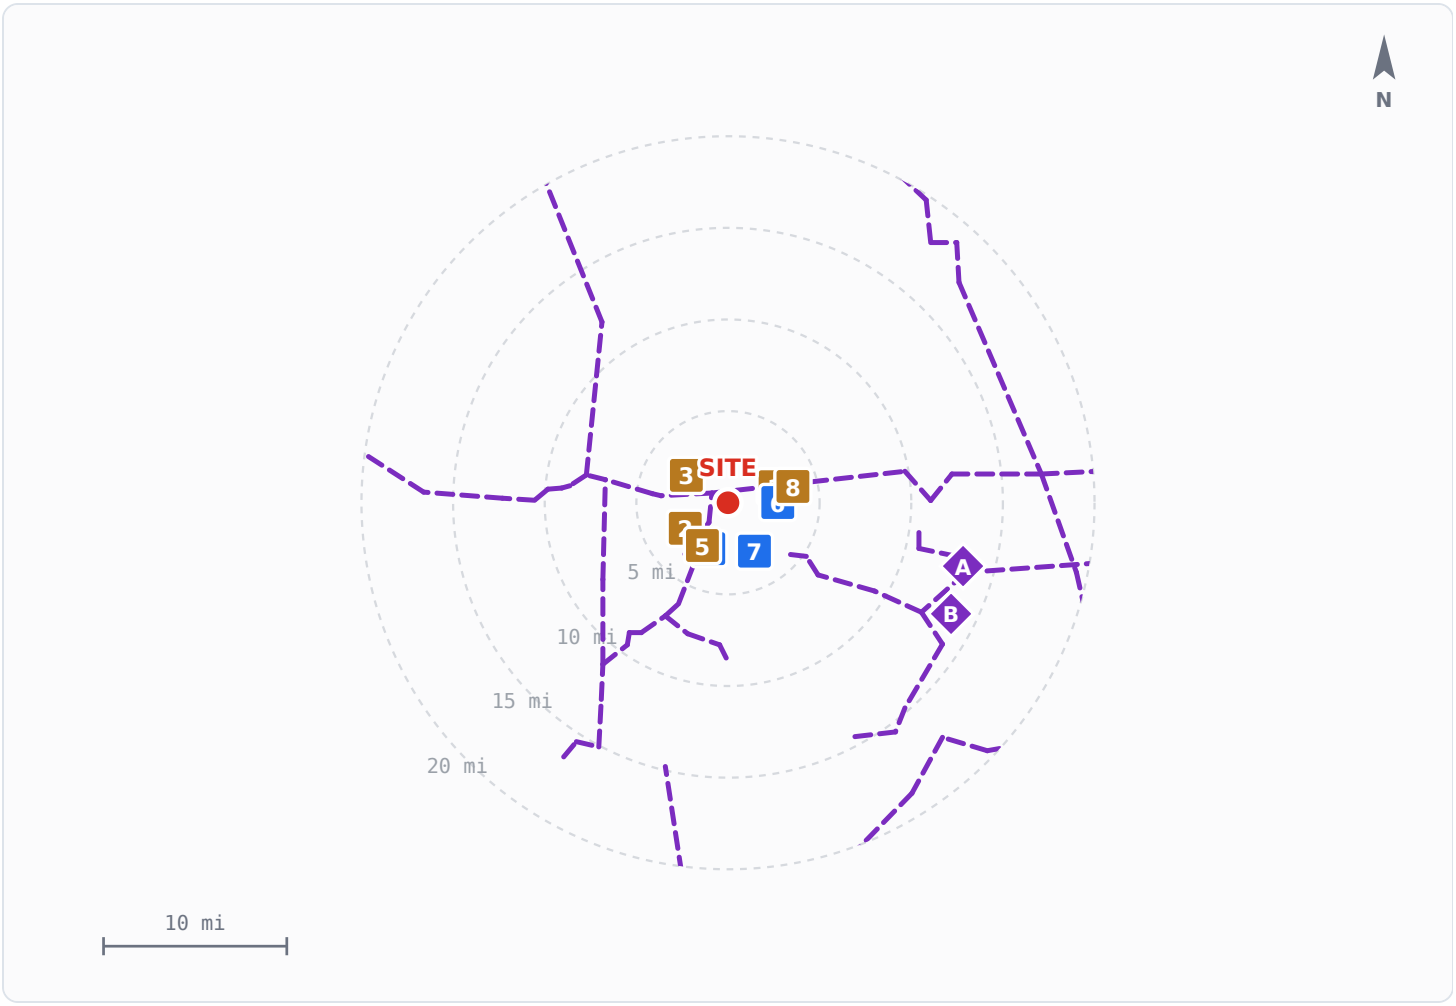
DISTANCE	OPERATOR (AS RECORDED)	TYPE	STATUS
0.63 mi	California Gas Transmission Co	Intrastate	Operating

One row per operator and type: the nearest point of that operator's mapped line. 1 within 25 mi.

Pipeline facilities within 15 miles

MAP	DISTANCE	FACILITY	NAME	OPERATOR	SOURCE DATE
A	**13.29** mi	Storage field	KIRBY HILLS FAIRFIELD, CA	LODI GAS STORAGE LLC depleted field	2018-12-01
B	**13.61** mi	Storage field	KIRBY HILLS FAIRFIELD, CA	LODI GAS STORAGE LLC aquifer	2018-12-01

Within 15 mi, nearest first. Letters match the gas map below. No compressor station within 15 mi; the nearest recorded is BETHANY, 38.2 mi away.



Intrastate gas pipeline ◆ Gas facility (natural gas section)

Pipelines: EIA Natural Gas Interstate and Intrastate Pipelines (Esri Living Atlas copy), layer last edited 2025-12-04. Facilities: HIFLD Open snapshot. Lines are mapped approximations at varying scale, not surveyed routes and not a locate. Lettered diamonds match the facility table above; numbered squares are the section 2 substations. Distances in the tables are measured, not scaled off this drawing.

- Distances are straight-line to the mapped line or point. EIA compiles the pipeline layer from many sources at varying scale and accuracy: it is not a surveyed route and not a locate. Call 811 before any ground disturbance.

- **Proximity to a transmission pipeline is not access to gas.** Taking service needs a tap or delivery point, capacity on the line and the operator's agreement. None of these is recorded in these datasets, and the pipeline layer records no diameter, pressure or capacity.
- Facility records are a HIFLD Open snapshot (source dates on the rows above: 2018). Facilities built or retired since are not reflected.
- Receipt/delivery points are where gas enters or leaves an interstate pipeline. They are not retail service points, and many carry duplicate records at one location.

Sources: EIA Natural Gas Interstate and Intrastate Pipelines (Esri Living Atlas copy) · layer last edited 2025-12-04; HIFLD Natural Gas Compressor Stations (2021 HIFLD Open mirror) and companion HIFLD layers (see section 7).

LOCAL MORATORIA

1 instrument recorded for these jurisdictions none active

Census places this point in Solano County · Fairfield-Suisun City CCD · Fairfield city. A county-level instrument is listed, and the point is inside an incorporated place — see Appendix B.
2 other instruments recorded within 25 miles (1 active or extended), measured to jurisdiction centroids.
Recorded is not the same as applicable, and the dataset is a lower bound: an absence here is not evidence that no moratorium exists. Detail and scope caveats: Appendix B.

Resolved: location, franchiseUtility, nearestSubstation, substationVoltage, watershed, floodZone

6 WHAT THIS REPORT DOES NOT TELL YOU

- Available load capacity at any substation. No utility publishes this for large loads; this report is a screening aid, not a system impact study.
- Interconnection cost or timeline for a specific project.
- Zoning approval likelihood.
- Interconnection queue activity at these substations. None of them could be checked: each is either unnamed in the source dataset or in a county with no PJM, ERCOT, BPA, APS, DUKE, LGE-KU, MISO, SOCO, SPP or TVA filings.
- Planned transmission work at these substations. The expansion tracker covers PJM planning materials and ERCOT's transmission project tracking workbook, and no substation above matched one of its entries.
- Substations built or planned since the substation dataset was compiled.
- Whether a local moratorium covers this site. Instruments recorded for the jurisdictions containing the point are listed in Appendix B, but their scope is set by their own text, which this report does not read.
- The utility's terms for large customers. No large-load tariff is on record for the named utility; the records cover a hand-verified set of utilities, not all of them, so this is not evidence that none exists.
- Whether natural gas service is available here, or the capacity, pressure, tap or lateral cost of any pipeline listed. The gas datasets record where facilities are mapped, not what they can deliver.
- Transmission line proximity — substations only.
- Whether a substation is physically accessible, expandable, or has available bay positions.

This report is built to **rule out sites with no nearby transmission infrastructure**. A site with nothing in range is a defensible elimination. The reverse does not hold: proximity to the facilities listed above is not access to power, and nothing here establishes that a connection is available, affordable or achievable on any schedule.

Screening aid, not an engineering study. This report helps prioritize sites before committing to engineering due diligence. It is not a system impact study and carries no warranty. Underlying public datasets are published on their own schedules and may have changed since the retrieval dates shown above. Every figure in this report is reproducible from the cited sources; nothing is estimated, modelled, or generated.

B APPENDIX — LOCAL MORATORIA

Local moratorium instruments — temporary pauses on accepting or approving certain development, most often data centers — as recorded in a third-party research dataset. Rows are reproduced as published; this report does not read the instruments themselves. This dataset tracks moratoria only — not project proposals, planning-commission reviews, or permanent zoning rules — so active local debate over a specific project will not appear here.

> **A recorded instrument is not a determination that this site is covered.** Which applications, zoning districts and sectors an instrument reaches — and whether a county instrument applies inside incorporated municipalities — is set by its text. Confirm with the jurisdiction before relying on any row.

Jurisdictions containing this point

Solano County, CA replaced

Matched to the Census geography **Solano County**, which contains this point · sectors: battery storage · adopted 2024-01-23 · current end *until an event (see status)* · ID ca-solano-county-2024

> This is a **county** instrument, and this point is also inside the incorporated place **Fairfield city**. Whether a county instrument reaches incorporated places depends on the state and on the instrument's own text.

STATUS AS RECORDED

Replaced. The two-year moratorium adopted 2024-01-23 (extended 2024-02-27) was superseded when the Board of Supervisors adopted permanent BESS zoning regulations on 2025-08-26.

LEGAL BASIS AS RECORDED

Urgency ordinance (extended 2024-02-27) enacting a pause on large-scale BESS approvals; replaced by a permanent BESS zoning ordinance adopted 2025-08-26

Within 25 miles

JURISDICTION	TYPE	STATUS	SECTORS	ADOPTED	ENDS	CENTROID
Vacaville, CA	City	replaced	battery storage	2024-05-14	*n/r*	13.0 mi
Richmond, CA	City	active	data centers	2026-09-15	*n/r*	22.3 mi

Distance is to the jurisdiction's centroid, not its boundary — a large county can begin much closer than the figure shown.

State-level actions — CA

ACTION	STATUS	MECHANISM	PROVISIONS AS RECORDED
SB57 (2025-2026)	enacted	other	Requires CPUC report to the Legislature by 2027-01-01 on whether new data center loads shift electrical costs to other customers; repeals 2031-01-01.

13 state-policy actions tracked for CA in total; only those the publisher records as enacted or in force are listed. Where the publisher's legal-effect field reads “unknown”, the current effect of an enacted measure has not been checked by the publisher, and it is omitted here rather than guessed. 33 local instruments recorded statewide.

Source: Moratorium Data 2026 (Bommarito) — local moratorium inventory · current through 2026-09-23 · commit dbaab04d84f8 · 1,291 instruments · CC-BY-4.0 (data) — attribution: Bommarito, Michael J. (2026), Moratorium Nation
`https://github.com/mjbommar/moratorium-data-2026`

- Each instrument is tied to a Census county, county subdivision or incorporated place only when the Census places the publisher's own centroid inside a geography of the same name and kind. 70 of 1,291 rows could not be tied this way and do not appear in this appendix.
- The publisher compiles the dataset from municipal records and news coverage with AI-assisted research and documents its known gaps in the repository.
